

COMET
ELECTRIC

POWERING YOUR PROJECTS

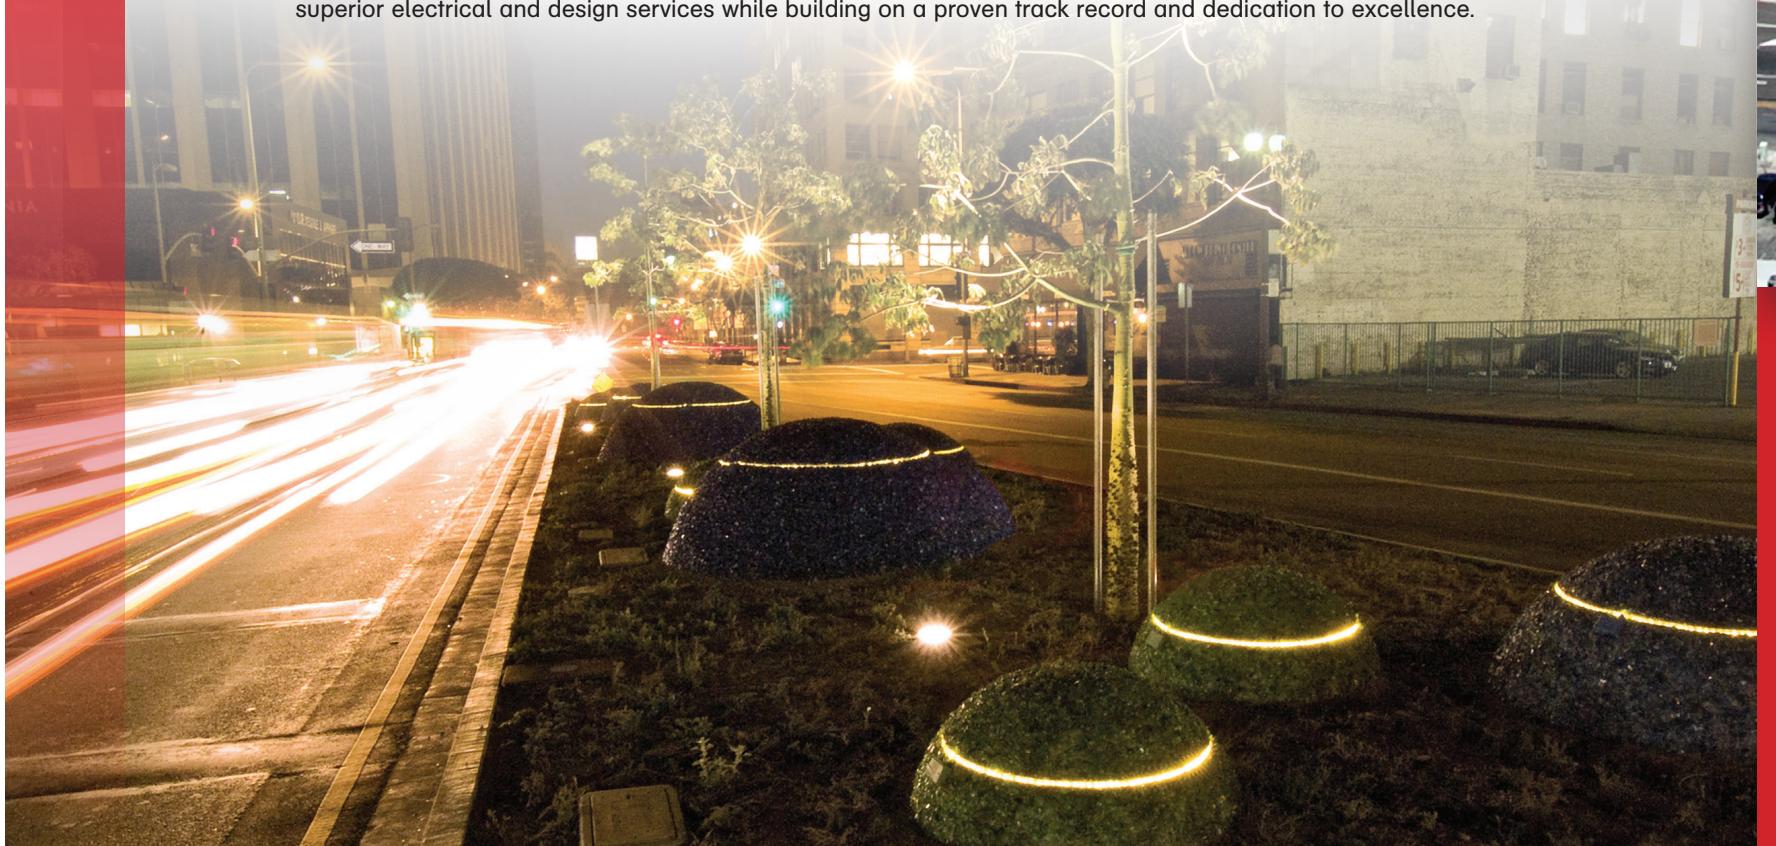

OUR STORY

Founded in 1976, Comet Electric has maintained a commitment to providing our clientele with the highest level of service through creative and innovative solutions, timely project completion and building long term industry partnerships in today's challenging and intricate construction industry.

We accomplish this by providing a wide array of installation and design services in sectors including but not limited to; commercial and industrial, educational and institutional, tenant improvement, retail and mixed-use, transportation, street lighting and traffic signal, health care, laboratory and process controls as well as design-build, design-assist and value engineering services.

Our Executive and Management teams have extensive and collective construction backgrounds in all aspects of the electrical industry; with an emphasis on planning and a team approach our staff is dedicated to taking on the unique and individual challenges each project affords.

We are proud to be a NECA organization and a signatory member with the IBEW. We are a LEED Certified Organization and U.S. Green Building Council Member. We look forward to a future continuing to provide superior electrical and design services while building on a proven track record and dedication to excellence.
